## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 1-25,30-33 are allowed.
2. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claims 1-20 is the inclusion of the following limitations: 'triggering an activation of a series of processes for preserving said memory with a triggering action, copying a first region of low memory, booting the computer system'.

The primary reason for the allowance of claims 21-25 is the inclusion of the following limitations: 'a Smear program which when operated configures said computer system to allow it to prepare a long term storage to receive data contents of said computer system's main memory after said computer system is restarted subsequent to said freezing, a Boot Crash Dump program which when operated configures said computer system to allow it to save the data contents of said main memory to said prepared long term storage'.

The primary reason for the allowance of claims 30-33 is inclusion of the following limitations: 'the block of computer memory for maintaining the one or more processing modules and associated data, the block of computer memory having a region of low computer memory and a reserved region of computer memory; a boot volume corresponding to a long term storage device for maintaining the set of processing modules and associated data, a set of system processing modules and associated data for booting said computer system and launching processing tasks associated with the set of processing modules'.
